

I love listening to KLOVE on my local station of 89.9 for the Lexington, KY area, especially since I live in Clay City which is 45 minutes away from Lexington. I believe that if the station is put on a lower frequency, then, I would be unable to receive it in my area. This is a wonderful, uplifting station that gives hearers a positive outlook on life in the world we live in. There are thousands of hurting people out in this world, that need to know that God is real and that He loves them and is ready to help them upon their request. I love this station and the message that it declares. The communities need it. Thank you
